

Series II shares

Invesco Van Kampen V.I. Growth and Income Fund

Shares of the Fund are currently offered only to insurance company separate accounts funding variable annuity contracts and variable life insurance policies.

Invesco Van Kampen V.I. Growth and Income Fund's investment objective is to seek long-term growth of capital and income.

This prospectus contains important information about the Series II class shares (Series II shares) of the Fund. Please read it before investing and keep it for future reference.

As with all other mutual fund securities, the Securities and Exchange Commission (SEC) has not approved or disapproved these securities or determined whether the information in this prospectus is adequate or accurate. Anyone who tells you otherwise is committing a crime.

An investment in the Fund:

- is not FDIC insured;
- may lose value; and
- is not guaranteed by a bank.

Shares of the Fund are used as investment vehicles for variable annuity contracts and variable life insurance policies (variable products) issued by certain insurance companies. You cannot purchase shares of the Fund directly. As an owner of a variable product (variable product owner) that offers the Fund as an investment option, however, you may allocate

your variable product values to a separate account of the insurance company that invests in shares of the Fund.

Your variable product is offered through its own prospectus, which contains information about your variable product, including how to purchase the variable product and how to allocate variable product values to the Fund.

Fund Summary

Investment Objective

The Fund's investment objective is to seek long-term growth of capital and income.

Fees and Expenses of the Fund

This table describes the fees and expenses that are incurred, directly or indirectly, when a variable product owner buys, holds, or redeems an interest in an insurance company separate account that invests in the Series II shares of the Fund but does not represent the effect of any fees or other expenses assessed in connection with your variable product, and if it did, expenses would be higher.

Shareholder Fees (fees paid directly from your investment)

	Class: Series II shares
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	N/A
Maximum Deferred Sales Charge (Load) (as a percentage of original purchase price or redemption proceeds, whichever is less)	N/A

"N/A" in the above table means "not applicable."

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

	Class: Series II shares
Management Fees	0.57%
Distribution and/or Service (12b-1) Fees	0.25
Other Expenses ¹	0.31
Total Annual Fund Operating Expenses ¹	1.13
Fee Waiver and/or Expense Reimbursement ²	0.26
Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement	0.87

1 "Other Expenses" and "Total Annual Fund Operating Expenses" are based on estimated amounts for the current fiscal year.

2 The Adviser has contractually agreed, through at least June 30, 2012, to waive advisory fees and/or reimburse expenses of all shares to the extent necessary to limit Total Annual Fund Operating Expenses (excluding certain items discussed below) of Series II shares to 0.87% of average daily net assets. In determining the Adviser's obligation to waive advisory fees and/or reimburse expenses, the following expenses are not taken into account, and could cause the Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement to exceed the limit reflected above: (i) interest; (ii) taxes; (iii) dividend expense on short sales; (iv) extraordinary or non-routine items; and (v) expenses that the Fund has incurred but did not actually pay because of an expense offset arrangement. Unless the Board of Trustees and Invesco Advisers, Inc. mutually agree to amend or continue the fee waiver agreement, it will terminate on June 30, 2012.

Example. This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example does not represent the effect of any fees or other expenses assessed in connection with your variable product, and if it did, expenses would be higher.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same.

Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Series II shares	\$89	\$306	\$571	\$1,327

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs. These

costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. The portfolio turnover rate of the Van Kampen Life Investment Trust Growth and Income Portfolio (the predecessor fund) for its most recent fiscal year was 55% of the average value of its portfolio.

Principal Investment Strategies of the Fund

Under normal market conditions, Invesco Advisers, Inc. (the Adviser), the Fund's investment adviser, seeks to achieve the Fund's investment objective by investing primarily in income-producing equity securities. Income-producing equity securities are common stocks and convertible securities (although investments are also made in non-convertible preferred stocks and debt securities rated investment grade). In selecting securities for investment, the Fund focuses primarily on the security's potential for growth of capital and income. The Fund's Adviser may focus on larger capitalization (or large cap) companies which it believes possess characteristics for improved valuation. Fund securities are typically sold when the assessments of the Fund's Adviser of the growth and income potential for such securities materially change. Under current market conditions, the Adviser generally defines large capitalization companies by reference to those companies with capitalizations within or above those companies represented in the Russell 1000® Index. As of December 31, 2009, these market capitalizations ranged between \$263 million and \$332.7 billion.

The Fund may invest up to 25% of its total assets in securities of foreign issuers. The Fund may invest up to 15% of its total assets in real estate investment trusts (REIT). The Fund may purchase and sell certain instruments, known as derivatives, such as options, futures contracts and options on futures contracts, for various portfolio management purposes, including to earn income, to facilitate portfolio management and to mitigate risks. In general terms, a derivative instrument is one whose value depends on (or is derived from) the value of an underlying asset, interest rate or index.

Principal Risks of Investing in the Fund

Investors who need a more assured level of current income should be aware that the Fund's income will fluctuate and that seeking income is only a part of the Fund's overall investment objective. Similarly, investors who seek only long-term growth should be aware that the Fund seeks to generate income and that long-term growth of capital is only a part of the Fund's overall investment objective.

An investment in the Fund is subject to risks, and you could lose money on your investment in the Fund. There can be no assurance that the Fund will achieve its investment objective. An investment in the Fund is not a deposit of any bank or other insured depository institution and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Market Risk. Market risk is the possibility that the market values of securities owned by the Fund will decline. Market risk may affect a single issuer, industry, sector of the economy or the market as a whole. Investments in equity securities generally are affected by changes in the stock markets, which fluctuate substantially over time, sometimes suddenly and sharply. The ability of the Fund's equity securities holdings to generate income is dependent on the earnings and the continuing declaration of dividends by the issuers of such securities. The values of income-producing equity securities may or may not move in tandem with overall changes in the stock market. The Fund's investments in fixed income or debt securities generally are affected by changes in interest rates and the creditworthiness of the issuer. The market prices of such securities tend to fall as interest rates rise, and such declines may be greater among securities with longer maturities. The values of convertible securities tend to decline as interest rates rise and, because of the

conversion feature, tend to vary with fluctuations in the market value of the underlying equity security.

Foreign Risks. Risks of investing in securities of foreign issuers, including emerging market issuers, can include fluctuations in foreign currencies, foreign currency exchange controls, political and economic instability, differences in financial reporting, differences in securities regulation and trading, and foreign taxation issues.

Risks of Investing in Real Estate Investment Trusts (REITs). Investing in REITs makes the Fund more susceptible to risks associated with the ownership of real estate and with the real estate industry in general and may involve duplication of management fees and certain other expenses. REITs may be less diversified than other pools of securities, may have lower trading volume, and may be subject to more abrupt or erratic price movements than the overall securities markets.

Risks of Using Derivative Instruments. Risks of derivatives include imperfect correlation between the value of the instruments and the underlying assets; risks of default by the other party to certain transactions; risks that the transactions may result in losses that partially or completely offset gains in portfolio positions; and risks that the instruments may not be liquid.

Performance Information

The bar chart and performance table provide an indication of the risks of investing in the Fund. The performance table compares the predecessor fund's performance to that of a broad-based securities market benchmark with similar investment objectives to the predecessor fund. The benchmark may not reflect payment of fees, expenses or taxes. The bar chart and performance table below do not reflect charges assessed in connection with your variable product; if they did, the performance shown would be lower. The Fund's (and the predecessor fund's) past performance is not necessarily an indication of its future performance.

The returns shown are those of the Class II shares of the predecessor fund, which are not offered by the Fund. The predecessor fund was advised by Van Kampen Asset Management. The predecessor fund was reorganized into Series II shares of Invesco Van Kampen V.I. Growth and Income Fund on June 1, 2010. Series II shares returns will be different from the predecessor fund as they have different expenses.

All performance shown assumes the reinvestment of dividends and capital gains.

Series I shares are not offered by this prospectus. The Series I shares and Series II shares invest in the same portfolio of securities and will have substantially similar performance, except to the extent that the expenses borne by each share class differ. Series II shares have higher expenses (and therefore lower performance) resulting from its Rule 12b-1 plan, which provides for a maximum fee equal to an annual rate of 0.25% (expressed as a percentage of average daily net assets of the Fund).

Annual Total Returns

The following bar chart shows changes in the performance of the predecessor fund's Class II shares from year to year. Class II shares of the predecessor fund and Series II shares are not subject to sales loads.

Best Quarter (ended September 30, 2009). 21.50%

Worst Quarter (ended December 31, 2008). (19.78%)

Average Annual Total Returns (for the periods ended December 31, 2009)

	1 Year	5 Years	Since Inception
Series II: Inception (06/01/10) ¹	24.11%	1.88%	3.24%
Russell 1000® Value Index: Inception (09/30/00)	19.69	(0.25)	2.32

1 The returns shown for these periods are the historical performance of the predecessor fund's Class II shares at net asset value and reflect the expenses applicable to the predecessor fund. The inception date of the predecessor fund's Class II shares is September 18, 2000.

Management of the Fund

Investment Adviser: Invesco Advisers, Inc. (the Adviser).

Portfolio Managers	Title	Length of Service
Thomas B. Bastian	Portfolio Manager (Lead)	2010 (predecessor fund 2003)
Mary Jayne Maly	Portfolio Manager	2010 (predecessor fund 2008)
James O. Roeder	Portfolio Manager	2010 (predecessor fund 1999)
Mark J. Laskin	Portfolio Manager	2010 (predecessor fund 2007)
Sergio Marcheli	Portfolio Manager	2010 (predecessor fund 2003)

Purchase and Sale of Fund Shares

You cannot purchase or sell (redeem) shares of the Fund directly. Please contact the insurance company that issued your variable product for more information on the purchase and sale of Fund shares. For more information, see "Other Information—Purchase and Sale of Shares" in the prospectus.

Tax Information

The Fund expects, based on its investment objective and strategies, that its distributions, if any, will consist of ordinary income, capital gains, or some combination of both. Because shares of the Fund must be purchased through a variable product, such distributions will be exempt from current taxation if left to accumulate within the variable product.

Payments to Insurance Companies

If you purchase the Fund through an insurance company or other financial intermediary, the Fund and the Fund's distributor or its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the insurance company or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's Web site for more information.

Investment Objective, Strategies, Risks and Portfolio Holdings

Investment Objective

The Fund's investment objective is to seek long-term growth of capital and income. The Fund's investment objective may be changed by the Board of Trustees (the Board) without shareholder approval.

Principal Investment Strategies and Risks

Under normal market conditions, the Adviser seeks to achieve the Fund's investment objective by investing primarily in income-producing equity securities, including common stocks and convertible securities; although investments are also made in non-convertible preferred stocks and debt securities rated investment grade, which are securities rated within the four highest grades assigned by Standard & Poor's (S&P) or by Moody's Investors Service, Inc. (Moody's). A more complete description of security ratings is contained in the Fund's Statement of Additional Information.

In selecting securities for investment, the Fund focuses primarily on the security's potential for capital growth and income. The Adviser may focus on larger capitalization companies that it believes possess characteristics for improved valuation. Under current market conditions, the Adviser generally defines large capitalization companies by reference to those companies with capitalizations within or above those companies represented in the Russell 1000® Index. As of December 31, 2009, these market capitalizations ranged between \$263 million and \$332.7 billion. The Adviser looks for catalysts for change that may positively impact a company, such as new management, industry development or regulatory change. The aim is to uncover these catalysts for change, and then benefit from potential stock price appreciation of the change taking place at the company. Although focusing on larger capitalization companies, the Fund may invest in securities of small- or medium-sized companies which often are subject to more abrupt or erratic market movements than securities of larger, more established companies or the market averages in general. In addition, such companies typically are subject to a greater degree of change in earnings and business prospects than are larger, more established companies.

The Fund may dispose of a security whenever, in the opinion of the Adviser, factors indicate it is desirable to do so. Such factors include changes in economic or market factors in general or with respect to a particular industry, changes in the market trends or other factors affecting an individual security, changes in the relative market performance or appreciation possibilities offered by individual securities and other circumstances bearing on the desirability of a given investment.

As with any managed fund, the Adviser may not be successful in selecting the best-performing securities or investment techniques, and the Fund's performance may lag behind that of similar funds.

While the Fund invests primarily in income-producing equity securities, the Fund also may invest in non-convertible adjustable or fixed rate preferred stock and debt securities.

Common Stocks. Common stocks are shares of a corporation or other entity that entitle the holder to a pro rata share of the profits of the corporation, if any, without preference over any other class of securities, including such entity's debt securities, preferred stock and other senior equity securities. Common stock usually carries with it the right to vote and frequently an exclusive right to do so.

Preferred Stock. Preferred stock generally has a preference as to dividends and liquidation over an issuer's common stock but ranks junior to debt securities in an issuer's capital structure. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer's board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

Convertible Securities. A convertible security is a bond, debenture, note, preferred stock, right, warrant or other security that may be converted into or exchanged for a prescribed amount of common stock or

other security of the same or a different issuer or into cash within a particular period of time at a specified price or formula. A convertible security generally entitles the holder to receive interest paid or accrued on debt securities or the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both debt and equity securities. The value of convertible securities tends to decline as interest rates rise and, because of the conversion feature, tends to vary with fluctuations in the market value of the underlying securities. Convertible securities ordinarily provide a stream of income with generally higher yields than those of common stock of the same or similar issuers. Convertible securities generally rank senior to common stock in a corporation's capital structure but are usually subordinated to comparable nonconvertible securities. Convertible securities generally do not participate directly in any dividend increases or decreases of the underlying securities although the market prices of convertible securities may be affected by any dividend changes or other changes in the underlying securities. Up to 15% of the Fund's net assets may be invested in convertible securities that are below investment grade quality. Debt securities rated below investment grade are commonly known as junk bonds. Although the Fund selects these securities primarily on the basis of their equity characteristics, investors should be aware that convertible securities rated in these categories are considered high risk securities; the rating agencies consider them speculative with respect to the issuer's continuing ability to make timely payments of interest and principal. Thus, to the extent that such convertible securities are acquired by the Fund, there is a greater risk as to the timely repayment of the principal of, and timely payment of interest or dividends on, such securities than in the case of higher-rated convertible securities.

Rights and warrants entitle the holder to buy equity securities at a specific price for a specific period of time. Rights typically have a substantially shorter term than do warrants. Rights and warrants may be considered more speculative and less liquid than certain other types of investments in that they do not entitle a holder to dividends or voting rights with respect to the underlying securities nor do they represent any rights in the assets of the issuing company. Rights and warrants may lack a secondary market.

Debt Securities. The Fund also may invest in debt securities of various maturities. The Fund invests only in debt securities rated investment grade at the time of investment, and a subsequent reduction in rating does not require the Fund to dispose of a security. Securities rated BBB by S&P or Baa by Moody's are in the lowest of the four investment grades and are considered by the rating agencies to be medium grade obligations which possess speculative characteristics so that changes in economic conditions or other circumstances are more likely to lead to a weakened capacity to make principal and interest payments than in the case of higher rated securities. A more complete description of security ratings is contained in the Fund's Statement of Additional Information. The market prices of debt securities generally fluctuate inversely with changes in interest rates so that the value of investments in such securities may decrease as interest rates rise and increase as interest rates fall. The market prices of longer-term debt securities generally tend to fluctuate more in response to changes in interest rates than shorter-term debt securities.

REITs. The Fund may invest up to 15% of its total assets in REITs. REITs pool investors' funds for investment primarily in commercial real estate properties or real-estate related loans. REITs generally derive their income from rents on the underlying properties or interest on the underlying loans, and their value is impacted by changes in the value of the underlying property or changes in interest rates affecting the underlying loans owned by the REITs. REITs are more susceptible to risks associated with the ownership of real estate and the real estate industry in general. These risks can include fluctuations in the value of underlying properties; defaults by borrowers or tenants; market saturation; changes in general and local economic conditions; decreases in market rates for

rents; increases in competition, property taxes, capital expenditures, or operating expenses; and other economic, political or regulatory occurrences affecting the real estate industry. In addition, REITs depend upon specialized management skills, may not be diversified (which may increase the volatility of the REIT's value), may have less trading volume and may be subject to more abrupt or erratic price movements than the overall securities market. REITs are not taxed on income distributed to shareholders provided they comply with several requirements of the Internal Revenue Code of 1986, as amended (the Code). REITs are subject to the risk of failing to qualify for tax-free pass-through of income under the Code. In addition, investments in REITs may involve duplication of management fees and certain other expenses, as the Fund indirectly bears its proportionate share of any expenses paid by REITs in which it invests.

Risks of Investing in Securities of Foreign Issuers. The Fund may invest up to 25% of its total assets in securities of foreign issuers. Securities of foreign issuers may be denominated in U.S. dollars or in currencies other than U.S. dollars. Investments in securities of foreign issuers present certain risks not ordinarily associated with investments in securities of U.S. issuers. These risks include fluctuations in foreign currency exchange rates, political, economic or legal developments (including war or other instability, expropriation of assets, nationalization and confiscatory taxation), the imposition of foreign exchange limitations (including currency blockage), withholding taxes on income or capital transactions or other restrictions, higher transaction costs (including higher brokerage, custodial and settlement costs and currency conversion costs) and possible difficulty in enforcing contractual obligations or taking judicial action. Securities of foreign issuers may not be as liquid and may be more volatile than comparable securities of domestic issuers.

In addition, there often is less publicly available information about many foreign issuers, and issuers of foreign securities are subject to different, often less comprehensive, auditing, accounting and financial reporting disclosure requirements than domestic issuers. There is generally less government regulation of exchanges, brokers and listed companies abroad than in the United States and, with respect to certain foreign countries, there is a possibility of expropriation or confiscatory taxation, or diplomatic developments which could affect investment in those countries. Because there is usually less supervision and governmental regulation of foreign exchanges, brokers and dealers than there is in the United States, the Fund may experience settlement difficulties or delays not usually encountered in the United States.

Delays in making trades in securities of foreign issuers relating to volume constraints, limitations or restrictions, clearance or settlement procedures, or otherwise could impact returns and result in temporary periods when assets of the Fund are not fully invested or attractive investment opportunities are foregone.

The Fund may invest in securities of issuers determined by the Adviser to be in developing or emerging market countries. Investments in securities of issuers in developing or emerging market countries are subject to greater risks than investments in securities of developed countries since emerging market countries tend to have economic structures that are less diverse and mature and political systems that are less stable than developed countries.

In addition to the increased risks of investing in securities of foreign issuers, there are often increased transaction costs associated with investing in securities of foreign issuers, including the costs incurred in connection with converting currencies, higher foreign brokerage or dealer costs and higher settlement costs or custodial costs.

Since the Fund may invest in securities denominated or quoted in currencies other than the U.S. dollar, the Fund may be affected by changes in foreign currency exchange rates (and exchange control regulations) which affect the value of investments in the Fund and the accrued income and appreciation or depreciation of the investments. Changes in foreign currency exchange rates relative to the U.S. dollar will affect the U.S. dollar value of the Fund's assets denominated in that

currency and the Fund's return on such assets as well as any temporary uninvested reserves in bank deposits in foreign currencies. In addition, the Fund will incur costs in connection with conversions between various currencies.

The Fund may invest in securities of foreign issuers in the form of depositary receipts. Depositary receipts involve substantially identical risks to those associated with direct investment in securities of foreign issuers. In addition, the underlying issuers of certain depositary receipts, particularly unsponsored or unregistered depositary receipts, are under no obligation to distribute shareholder communications to the holders of such receipts, or to pass through to them any voting rights with respect to the deposited securities.

Derivatives. The Fund may, but is not required to, use various investment strategies for a variety of purposes including hedging, risk management, portfolio management or to earn income. The Fund's use of derivative transactions may involve the purchase and sale of derivative instruments such as options, forwards, futures, options on futures, swaps and other related instruments and techniques. Such derivatives may be based on a variety of underlying instruments, including equity and debt securities, indexes, interest rates, currencies and other assets. Derivatives often have risks similar to the securities underlying the derivatives and may have additional risks as described herein. The Fund's use of derivatives may also include other instruments, strategies and techniques, including newly developed or permitted instruments, strategies and techniques, consistent with the Fund's investment objective and applicable regulatory requirements.

A futures contract is a standardized agreement between two parties to buy or sell a specific quantity of an underlying instrument at a specific price at a specific future time. The value of a futures contract tends to increase and decrease in tandem with the value of the underlying instrument. Futures contracts are bilateral agreements, with both the purchaser and the seller equally obligated to complete the transaction. Depending on the terms of the particular contract, futures contracts are settled through either physical delivery of the underlying instrument on the settlement date or by payment of a cash settlement amount on the settlement date. The Fund's use of futures may not always be successful. The prices of futures can be highly volatile, using them could lower total return, and the potential loss from futures can exceed the Fund's initial investment in such contracts.

The use of derivatives involves risks that are different from, and possibly greater than, the risks associated with other portfolio investments. Derivatives may involve the use of highly specialized instruments that require investment techniques and risk analyses different from those associated with other portfolio investments. The Fund complies with applicable regulatory requirements when implementing derivatives, including the segregation of cash and/or liquid securities on the books of the Fund's custodian, as mandated by SEC rules or SEC staff positions. Although the Adviser seeks to use derivatives to further the Fund's investment objective, no assurance can be given that the use of derivatives will achieve this result.

Other Investments and Risk Factors

For cash management purposes, the Fund may engage in repurchase agreements with broker-dealers, banks and other financial institutions to earn a return on temporarily available cash. Such transactions are considered loans by the Fund and are subject to the risk of default by the other party. The Fund will only enter into such agreements with parties deemed to be creditworthy by the Adviser under guidelines approved by the Board.

The Fund may invest up to 15% of its net assets in illiquid securities and certain restricted securities. Such securities may be difficult or impossible to sell at the time and the price that the Fund would like. Thus, the Fund may have to sell such securities at a lower price, sell other securities instead to obtain cash or forego other investment opportunities.

The Fund may sell securities without regard to the length of time they have been held to take advantage of new investment opportunities, when the Adviser believes the potential for long-term capital growth and income has lessened, or for other reasons. The Fund's turnover rate may vary from year to year. A high portfolio turnover rate (100% or more) increases a fund's transaction costs (including brokerage commissions and dealer costs), which would adversely impact a fund's performance. Higher portfolio turnover may result in the realization of more short-term capital gains than if a fund had lower portfolio turnover. The turnover rate will not be a limiting factor, however, if the Adviser considers portfolio changes appropriate.

Temporary Defensive Strategy. When market conditions dictate a more defensive investment strategy, the Fund may, on a temporary basis, hold cash or invest a portion or all of its assets in securities issued or guaranteed by the U.S. government, its agencies or instrumentalities, prime commercial paper, certificates of deposit, bankers' acceptances and other obligations of domestic banks having total assets of at least \$500 million, and repurchase agreements. Under normal market conditions, the potential for capital growth and income on these securities will tend to be lower than the potential for capital growth and income on other securities that may be owned by the Fund. In taking such a defensive position, the Fund would temporarily not be pursuing its principal investment strategies and may not achieve its investment objective.

Portfolio Holdings

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information (SAI), which is available at www.invesco.com.

Fund Management

The Adviser

Invesco Advisers, Inc. (the Adviser or Invesco) serves as the Fund's investment adviser. The Adviser manages the investment operations of the Fund as well as other investment portfolios that encompass a broad range of investment objectives, and has agreed to perform or arrange for the performance of the Fund's day-to-day management. The Adviser is located at 1555 Peachtree Street, N.E., Atlanta, Georgia 30309. The Adviser, as successor in interest to multiple investment advisers, has been an investment adviser since 1976.

Adviser Compensation

Advisory Agreement. The Fund retains the Adviser to manage the investment of its assets and to place orders for the purchase and sale of its portfolio securities. Under an investment advisory agreement between the Adviser and the Fund, the Fund pays the Adviser a monthly fee computed based upon an annual rate applied to the average daily net assets of the Fund as follows:

Average Daily Net Assets	% Per Annum
First \$500 million	0.600%
Over \$500 million	0.550

When issued, a discussion regarding the basis for the Board's approval of the investment advisory and investment sub-advisory agreements of the Fund will be available in the Fund's first annual or semiannual report to shareholders.

Portfolio Managers

The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

- Thomas B. Bastian, Portfolio Manager, has been responsible for the Fund since 2010. Mr. Bastian served as Portfolio Manager of the

predecessor fund since 2003. Mr. Bastian was associated with Van Kampen Asset Management in an investment management capacity (2003 to 2010). Mr. Bastian is the lead portfolio manager of the Fund.

- Mary Jayne Maly, Portfolio Manager, has been responsible for the Fund since 2010. Ms. Maly served as Portfolio Manager of the predecessor fund since 2008. Ms. Maly was associated with Van Kampen Asset Management in an investment management capacity (1992 to 2010).
- James O. Roeder, Portfolio Manager, has been responsible for the Fund since 2010. Mr. Roeder served as Portfolio Manager of the predecessor fund since 1999. Mr. Roeder was associated with Van Kampen Asset Management in an investment management capacity (1999 to 2010).
- Mark J. Laskin, Portfolio Manager, has been responsible for the Fund since 2010. Mr. Laskin served as Portfolio Manager of the predecessor fund since 2007. Mr. Laskin was associated with Van Kampen Asset Management in an investment management capacity (2000 to 2010).
- Sergio Marcheli, Portfolio Manager, has been responsible for the Fund since 2010. Mr. Marcheli served as Portfolio Manager of the predecessor fund since 2003. Mr. Marcheli was associated with Van Kampen Asset Management in an investment management capacity (2002 to 2010). Mr. Marcheli manages the cash position in the Portfolio, submits trades and aids in providing research.

A lead manager generally has final authority over all aspects of a portion of the Fund's investment portfolio, including but not limited to, purchases and sales of individual securities, portfolio construction techniques, portfolio risk assessment, and the management of daily cash flows in accordance with portfolio holdings. The degree to which a lead manager may perform these functions, and the nature of these functions, may change from time to time.

More information on the portfolio managers may be found at www.invesco.com. The Web site is not part of the prospectus.

The Fund's SAI provides additional information about the portfolio managers' investments in the Fund, a description of the compensation structure and information regarding other accounts managed.

Other Information

Purchase and Sale of Shares

The Fund ordinarily effects orders to purchase and redeem shares at the Fund's next computed net asset value after it receives an order. Insurance companies participating in the Fund serve as the Fund's designee for receiving orders of separate accounts that invest in the Fund. The Fund may postpone the right of redemption only under unusual circumstances, as allowed by the SEC, such as when the New York Stock Exchange (NYSE) restricts or suspends trading.

Although the Fund generally intends to pay redemption proceeds solely in cash, the Fund reserves the right to determine, in its sole discretion, whether to satisfy redemption requests by making payment in securities or other property (known as a redemption in kind).

Shares of the Fund are offered in connection with mixed and shared funding, *i.e.*, to separate accounts of affiliated and unaffiliated insurance companies funding variable products. The Fund currently offers shares only to insurance company separate accounts. In the future, the Fund may offer them to pension and retirement plans that qualify for special federal income tax treatment. Due to differences in tax treatment and other considerations, the interests of Fund shareholders, including variable product owners and plan participants investing in the Fund (whether directly or indirectly through fund of funds), may conflict.

Mixed and shared funding may present certain conflicts of interest. For example, violation of the federal tax laws by one insurance company separate account investing directly or indirectly in a fund could cause variable products funded through another insurance company separate

account to lose their tax-deferred status, unless remedial actions were taken. The Board will monitor for the existence of any material conflicts and determine what action, if any, should be taken. A fund's net asset value could decrease if it had to sell investment securities to pay redemption proceeds to a separate account (or plan) withdrawing because of a conflict.

Excessive Short-Term Trading Activity Disclosure

The Fund's investment programs are designed to serve long-term investors and are not designed to accommodate excessive short-term trading activity in violation of our policies described below. Excessive short-term trading activity in the Fund's shares (*i.e.*, purchases of Fund shares followed shortly thereafter by redemptions of such shares, or vice versa) may hurt the long-term performance of the Fund by requiring it to maintain an excessive amount of cash or to liquidate portfolio holdings at a disadvantageous time, thus interfering with the efficient management of the Fund by causing it to incur increased brokerage and administrative costs. Where excessive short-term trading activity seeks to take advantage of arbitrage opportunities from stale prices for portfolio securities, the value of Fund shares held by long-term investors may be diluted.

The Board has adopted policies and procedures designed to discourage excessive short-term trading of Fund shares. The Fund may alter its policies and procedures at any time without giving prior notice to Fund shareholders, if the Adviser believes the change would be in the best interests of long-term investors.

Pursuant to the Fund's policies and procedures, Invesco and certain of its corporate affiliates (Invesco and such affiliates, collectively, the Invesco Affiliates) currently use the following tools designed to discourage excessive short-term trading in the Fund:

- (1) trade activity monitoring; and
- (2) the use of fair value pricing consistent with procedures approved by the Board.

Each of these tools is described in more detail below.

In addition, restrictions designed to discourage or curtail excessive short-term trading activity may be imposed by the insurance companies and/or their separate accounts that invest in the Fund on behalf of variable product owners. Variable product owners should refer to the applicable contract and related prospectus for more details.

Trade Activity Monitoring

To detect excessive short-term trading activities, the Invesco Affiliates will monitor, on a daily basis, selected aggregate purchase, or redemption trade orders placed by insurance companies and/or their separate accounts. The Invesco Affiliates will seek to work with insurance companies to discourage variable product owners from engaging in abusive trading practices. However, the ability of the Invesco Affiliates to monitor trades that are placed by variable product owners is severely if not completely limited due to the fact that the insurance companies trade with the Fund through omnibus accounts, and maintain the exclusive relationship with, and are responsible for maintaining the account records of, their variable product owners. There may also be legal and technological limitations on the ability of insurance companies to impose restrictions on the trading practices of their variable product owners. As a result, there can be no guarantee that the Invesco Affiliates will be able to detect or deter market timing by variable product owners.

If, as a result of this monitoring, the Invesco Affiliates believe that a variable product owner has engaged in excessive short-term trading (regardless of whether or not the insurance company's own trading restrictions are exceeded), the Invesco Affiliates will seek to act in a manner that they believe is consistent with the best interests of long-term investors, which may include taking steps such as (i) asking the insurance company to take action to stop such activities, or (ii) refusing to process future purchases related to such activities in the insurance company's account with the Fund. The Invesco Affiliates will use reasonable efforts to

apply the Fund's policies uniformly given the potential limitations described above.

Fair Value Pricing

Securities owned by the Fund are to be valued at current market value if market quotations are readily available. All other securities and assets of the Fund for which market quotations are not readily available are to be valued at fair value determined in good faith using procedures approved by the Board. An effect of fair value pricing may be to reduce the ability of frequent traders to take advantage of arbitrage opportunities resulting from potentially "stale" prices of portfolio holdings. However, it cannot eliminate the possibility of frequent trading.

See "Pricing of Shares—Determination of Net Asset Value" for more information.

Risks

There is the risk that the Fund's policies and procedures will prove ineffective in whole or in part to detect or prevent excessive short-term trading. Although these policies and procedures, including the tools described above, are designed to discourage excessive short-term trading, they do not eliminate the possibility that excessive short-term trading activity in the Fund will occur. Moreover, each of these tools involves judgments that are inherently subjective. The Invesco Affiliates seek to make these judgments to the best of their abilities in a manner that they believe is consistent with the best interests of long-term investors. However, there can be no assurance that the Invesco Affiliates will be able to gain access to any or all of the information necessary to detect or prevent excessive short-term trading by a variable product owner. While the Invesco Affiliates and the Fund may seek to take actions with the assistance of the insurance companies that invest in the Fund, there is the risk that neither the Invesco Affiliates nor the Fund will be successful in their efforts to minimize or eliminate such activity.

Pricing of Shares

Determination of Net Asset Value

The price of the Fund's shares is the Fund's net asset value per share. The Fund values portfolio securities for which market quotations are readily available at market value. The Fund values all other securities and assets for which market quotations are unavailable or unreliable at their fair value in good faith using procedures approved by the Board. The Board has delegated the daily determination of good faith fair value methodologies to the Adviser's Valuation Committee, which acts in accordance with Board approved policies. On a quarterly basis, Invesco provides the Board various reports indicating the quality and effectiveness of its fair value decisions on portfolio holdings. Securities and other assets quoted in foreign currencies are valued in U.S. dollars based on the prevailing exchange rates on that day.

Even when market quotations are available, they may be stale or they may be unreliable because the security is not traded frequently, trading on the security ceased before the close of the trading market or issuer specific events occurred after the security ceased trading or because of the passage of time between the close of the market on which the security trades and the close of the NYSE and when the Fund calculates its net asset value. Issuer specific events may cause the last market quotation to be unreliable. Such events may include a merger or insolvency, events which affect a geographical area or an industry segment, such as political events or natural disasters, or market events, such as a significant movement in the U.S. market. Where market quotations are not readily available, including where the Adviser determines that the closing price of the security is unreliable, the Adviser will value the security at fair value in good faith using procedures approved by the Board. Fair value pricing may reduce the ability of frequent traders to take advantage of arbitrage opportunities resulting from potentially "stale"

prices of portfolio holdings. However, it cannot eliminate the possibility of frequent trading.

Fair value is that amount that the owner might reasonably expect to receive for the security upon its current sale. Fair value requires consideration of all appropriate factors, including indications of fair value available from pricing services. A fair value price is an estimated price and may vary from the prices used by other mutual funds to calculate their net asset values.

The Adviser may use indications of fair value from pricing services approved by the Board. In other circumstances, the Adviser valuation committee may fair value securities in good faith using procedures approved by the Board. As a means of evaluating its fair value process, the Adviser routinely compares closing market prices, the next day's opening prices for the security in its primary market if available, and indications of fair value from other sources. Fair value pricing methods and pricing services can change from time to time as approved by the Board.

Specific types of securities are valued as follows:

Domestic Exchange Traded Equity Securities. Market quotations are generally available and reliable for domestic exchange traded equity securities. If market quotations are not available or are unreliable, the Adviser will value the security at fair value in good faith using procedures approved by the Board.

Foreign Securities. If market quotations are available and reliable for foreign exchange traded equity securities, the securities will be valued at the market quotations. Because trading hours for certain foreign securities end before the close of the NYSE, closing market quotations may become unreliable. If between the time trading ends on a particular security and the close of the customary trading session on the NYSE events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. If an issuer specific event has occurred that the Adviser determines, in its judgment, is likely to have affected the closing price of a foreign security, it will price the security at fair value. The Adviser also relies on a screening process from a pricing vendor to indicate the degree of certainty, based on historical data, that the closing price in the principal market where a foreign security trades is not the current market value as of the close of the NYSE. For foreign securities where the Adviser believes, at the approved degree of certainty, that the price is not reflective of current market value, the Adviser will use the indication of fair value from the pricing service to determine the fair value of the security. The pricing vendor, pricing methodology or degree of certainty may change from time to time.

Fund securities primarily traded on foreign markets may trade on days that are not business days of the Fund. Because the net asset value of Fund shares is determined only on business days of the Fund, the value of the portfolio securities of the Fund that invests in foreign securities may change on days when you will not be able to purchase or redeem shares of the Fund.

Fixed Income Securities. Government, corporate, asset-backed and municipal bonds and convertible securities, including high yield or junk bonds, and loans, normally are valued on the basis of prices provided by independent pricing services. Prices provided by the pricing services may be determined without exclusive reliance on quoted prices, and may reflect appropriate factors such as institution-size trading in similar groups of securities, developments related to special securities, dividend rate, maturity and other market data. Prices received from pricing services are fair value prices. In addition, if the price provided by the pricing service and independent quoted prices are unreliable, the Adviser valuation committee will fair value the security using procedures approved by the Board.

Short-Term Securities. The Fund's short-term investments are valued at amortized cost when the security has 60 days or less to maturity.

Futures and Options. Futures contracts are valued at the final settlement price set by the exchange on which they are principally traded. Options are valued on the basis of market quotations, if available.

Swap Agreements. Swap Agreements are fair valued using an evaluated quote provided by an independent pricing service. Evaluated quotes provided by the pricing service are based on a model that may include end of day net present values, spreads, ratings, industry and company performance.

Open-End Funds. To the extent the Fund invests in other open-end funds, other than open-end funds that are exchange traded, the investing fund will calculate its net asset value using the net asset value of the underlying fund in which it invests.

The Fund discloses portfolio holdings at different times to insurance companies issuing variable products that invest in the Fund, and in annual and semi-annual shareholder reports. Refer to such reports to determine the types of securities in which the Fund has invested. You may also refer to the SAI to determine what types of securities in which the Fund may invest. You may obtain copies of these reports or of the SAI from the insurance company that issued your variable product, or from the Adviser as described on the back cover of this prospectus.

The Fund determines the net asset value of its shares on each day the NYSE is open for business, as of the close of the customary trading session, or earlier NYSE closing time that day.

Taxes

The Fund intends to qualify each year as a regulated investment company and, as such, is not subject to entity-level tax on the income and gain it distributes to shareholders. Insurance company separate accounts may invest in the Fund and, in turn, may offer variable products to investors through insurance contracts. Because the insurance company separate accounts are generally the shareholders in the Fund (not the variable product owners), all of the tax characteristics of the Fund's investments flow into the separate accounts. The tax consequences from each variable product owner's investment in a variable product contract will depend upon the provisions of these contracts, and variable product owners should consult their contract prospectus for more information on these tax consequences.

Distributions

The Fund expects, based on its investment objective and strategies, that its distributions, if any, will consist of ordinary income, capital gains, or some combination of both.

Dividends

The Fund generally declares and pays dividends from net investment income, if any, annually to separate accounts of insurance companies issuing the variable products.

Capital Gains Distributions

The Fund generally distributes long-term and short-term capital gains (net of any capital loss carryovers), if any, at least annually to separate accounts of insurance companies issuing the variable products.

At the election of insurance companies issuing the variable products, dividends and distributions are automatically reinvested at net asset value in shares of the Fund.

Share Classes

The Fund has two classes of shares, Series I shares and Series II shares. Each class is identical except that Series II shares has a distribution or "Rule 12b-1 Plan" which is described in this prospectus.

Distribution Plan

The Fund has adopted a distribution or "Rule 12b-1" plan for its Series II shares. The plan allows the Fund to pay distribution fees to life insurance companies and others to promote the sale and distribution of Series II shares. The plan provides for a maximum fee equal to an annual rate of 0.25% (expressed as a percentage of average daily net assets of the Fund). Because the Fund pays these fees out of its assets on an ongoing

basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of charges.

Payments to Insurance Companies

The insurance company that issued your variable product, or one of its affiliates may receive all the Rule 12b-1 distribution fees discussed above. In addition to those payments, Invesco Distributors, Inc., the distributor of the Fund and an Invesco Affiliate, and other Invesco Affiliates may make cash payments to the insurance company that issued your variable product or the insurance company's affiliates in connection with promotion of the Fund and certain other marketing support services. Invesco Affiliates make these payments from their own resources.

Invesco Affiliates make these payments as incentives to certain insurance companies to promote the sale and retention of shares of the Fund. The benefits Invesco Affiliates receive when they make these payments may include, among other things, adding the Fund to the list of underlying investment options in the insurance company's variable products, and access (in some cases on a preferential basis over other competitors) to individual members of an insurance company's sales force or to an insurance company's management. These payments are sometimes referred to as "shelf space" payments because the payments compensate the insurance company for including the Fund in its variable products (on its "sales shelf"). Invesco Affiliates compensate insurance companies differently depending typically on the level and/or type of considerations provided by the insurance companies. The payments Invesco Affiliates make may be calculated on sales of shares of the Fund (Sales-Based Payments), in which case the total amount of such payments shall not exceed 0.25% of the offering price of all shares sold through variable products during the particular period. Such payments also may be calculated on the average daily net assets of the Fund attributable to that particular insurance company (Asset-Based Payments), in which case the total amount of such cash payments shall not exceed 0.25% per annum of those assets during a defined period. Sales-Based Payments primarily create incentives to make sales of shares of the Fund and Asset-Based Payments primarily create incentives to retain assets of the Fund in insurance company separate accounts.

Invesco Affiliates are motivated to make the payments described above in order to promote the sale of Fund shares and the retention of those investments by clients of insurance companies. To the extent insurance companies sell more shares of the Fund or retain shares of the Fund in their variable product owners' accounts, Invesco Affiliates may directly or indirectly benefit from the incremental management and other fees paid to Invesco Affiliates by the Fund with respect to those assets.

In addition to the payments listed above, the Adviser may also reimburse insurance companies for certain administrative services provided to variable product owners. Under a Master Administrative Services Agreement, between the Fund and the Adviser, the Adviser is entitled to receive from the Fund reimbursement of its costs or such reasonable compensation as may be approved by the Board. Under this arrangement, the Adviser provides, or assures that insurance companies issuing variable products will provide, certain variable product owner-related services. These services, include, but are not limited to, facilitation of variable product owners' purchase and redemption requests; distribution to existing variable product owners of copies of Fund prospectuses, proxy materials, periodic Fund reports, and other materials; maintenance of variable product owners' records; and Fund services and communications. Currently, these administrative service payments made by the Fund to the Adviser are subject to an annual limit of 0.25% of the average daily net assets invested in the Fund by each insurance company. Any amounts paid by the Adviser to an insurance company in excess of 0.25% of the average daily net assets invested in the Fund are paid by the Adviser out of its own financial resources, and not out of the Fund's assets. Insurance companies may earn profits on these payments for these services, since the amount of the payments may exceed the cost of providing the service.

You can find further details in the SAI about these payments and the services provided by insurance companies. In certain cases these payments could be significant to the insurance company. Your insurance company may charge you additional fees or commissions, on your variable product other than those disclosed in this prospectus. You can ask your insurance company about any payments it receives from Invesco Affiliates, or the Fund, as well as about fees and/or commissions it charges. The prospectus for your variable product may also contain additional information about these payments.

Benchmark Descriptions

Financial Highlights

The financial highlights show the predecessor fund's financial history for the past five fiscal years ended December 31, 2009. The financial highlights table is intended to help you understand the financial performance of the predecessor fund's Class II shares. The Fund has the same investment objective and similar investment policies as the predecessor fund. Certain information reflects financial results for a single predecessor fund share.

The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the predecessor fund (assuming reinvestment of all dividends and distributions).

The information has been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the predecessor fund's financial statements, is included in the predecessor fund's annual report, which is available upon request.

	Year Ended December 31,				
	2009	2008	2007	2006	2005
Class II Shares					
Net Asset Value,					
Beginning of the Period	\$ 13.71	\$ 21.31	\$ 21.96	\$ 20.46	\$ 19.29

Portfolio Turnover	55%	50%	28%	28%	42%

(a) Based on average shares outstanding.

(b) These returns include combined Rule 12b-1 fees and service fees of up to 0.25%.

Obtaining Additional Information

More information may be obtained free of charge upon request. The SAI, a current version of which is on file with the SEC, contains more details about the Fund and is incorporated by reference into the prospectus (is legally a part of the prospectus). When issued, annual and semiannual reports to shareholders will contain additional information about the Fund's investments. The Fund's annual report will discuss the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. The Fund will also file its complete schedule of portfolio holdings with the SEC for the 1st and 3rd quarters of each fiscal year on Form N-Q. The Fund's most recent portfolio holdings, as filed on Form N-Q, will also be made available to insurance companies issuing variable products that invest in the Fund.

If you wish to obtain free copies of the Fund's current SAI or annual or semiannual reports, please contact the insurance company that issued your variable product, or you may contact us.
